**CYBER ROBOTIC  
CENTER**

CYBERNICX

# CYBER ROBOTIC CENTER

**Cyber Robotic Center** is a healthcare facility located in Istanbul, serving as the creator and practitioner of the Cybernicx treatment approach. By combining cutting-edge technology and evidence-based treatment modalities, it is the world's first and only institution implementing an original and effective treatment model for various diseases.

CYBERNICKX

Introduction

## About **Cyber Robotic Center**

### **Mission**

As Cyber Robotic Center, we work to help people achieve their best. Along with human-oriented research and development projects in the field of neuromuscular diseases, we produce projects in the field of robotics, neural stem cells and epidural stimulation.

### **Vision**

As Cyber Robotic Center, we want to offer the best and most pioneering health solutions in our field by combining technology and science for the whole world. The most valuable point for us: people to spend their lives happily and at their best.

CYBERNICX

# Cyber Robotic Center Presents **CYBERNICX**

## What is CYBERNICX?

**Cybernicx** is a therapy approach that helps the patient to stand up and recover movement functions after neuromuscular diseases such as stroke, Spinal muscular atrophy (SMA), spinal bulbar muscular atrophy (SBMA), muscular dystrophy, cerebral palsy, multiple sclerosis (MS), Charcot-Marie-Tooth disease, distal myopathy, sporadic inclusion body myositis, congenital myopathy and amyotrophic lateral sclerosis (ALS) with **personalised mapping, treatment and planning.**

# Supporting Applications

Cyber Epidural Stimulation

Cyber Neuro+ Stem Cell

Cyber Physio

Cyber Sports

Cyber Suit

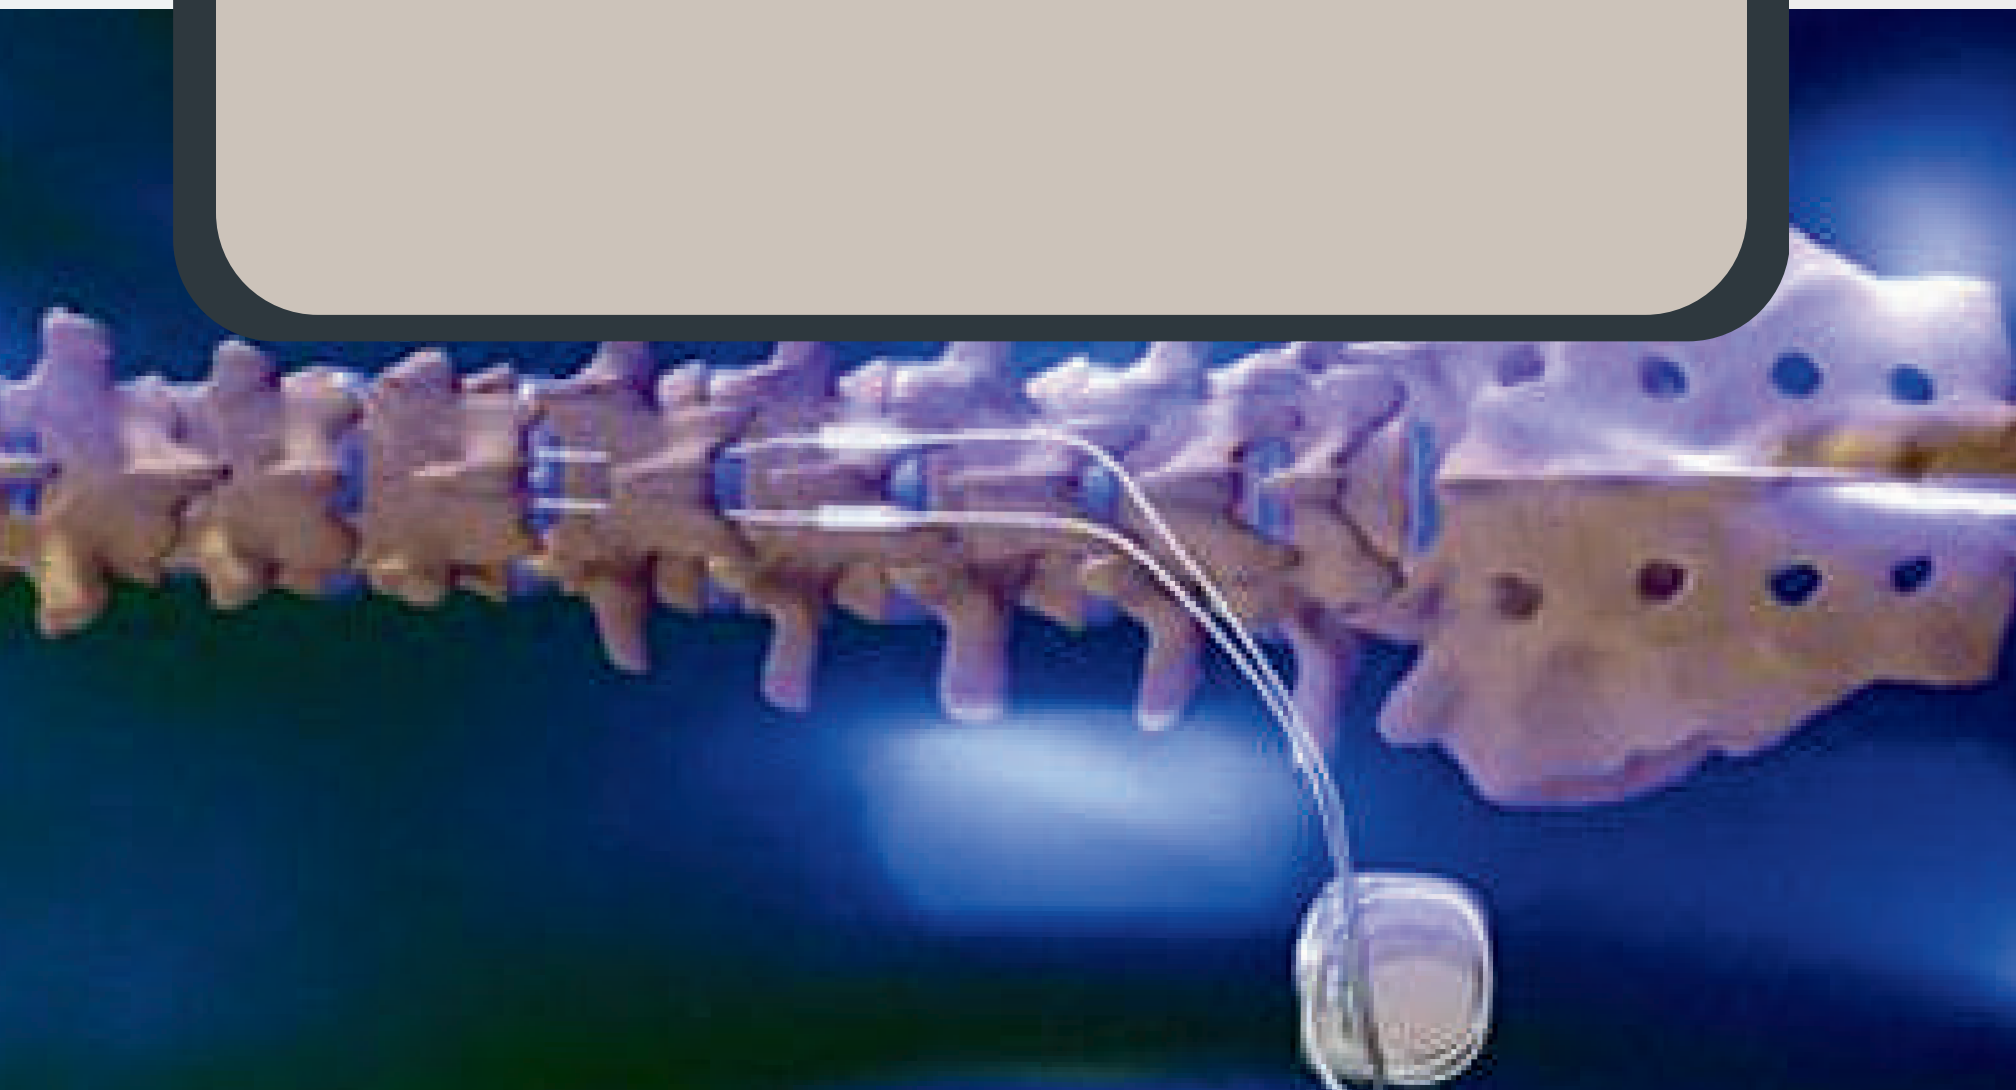

Focus Calm

fMRI, fNIRS & EMG

TecnoBody D-WALL & WalkerView

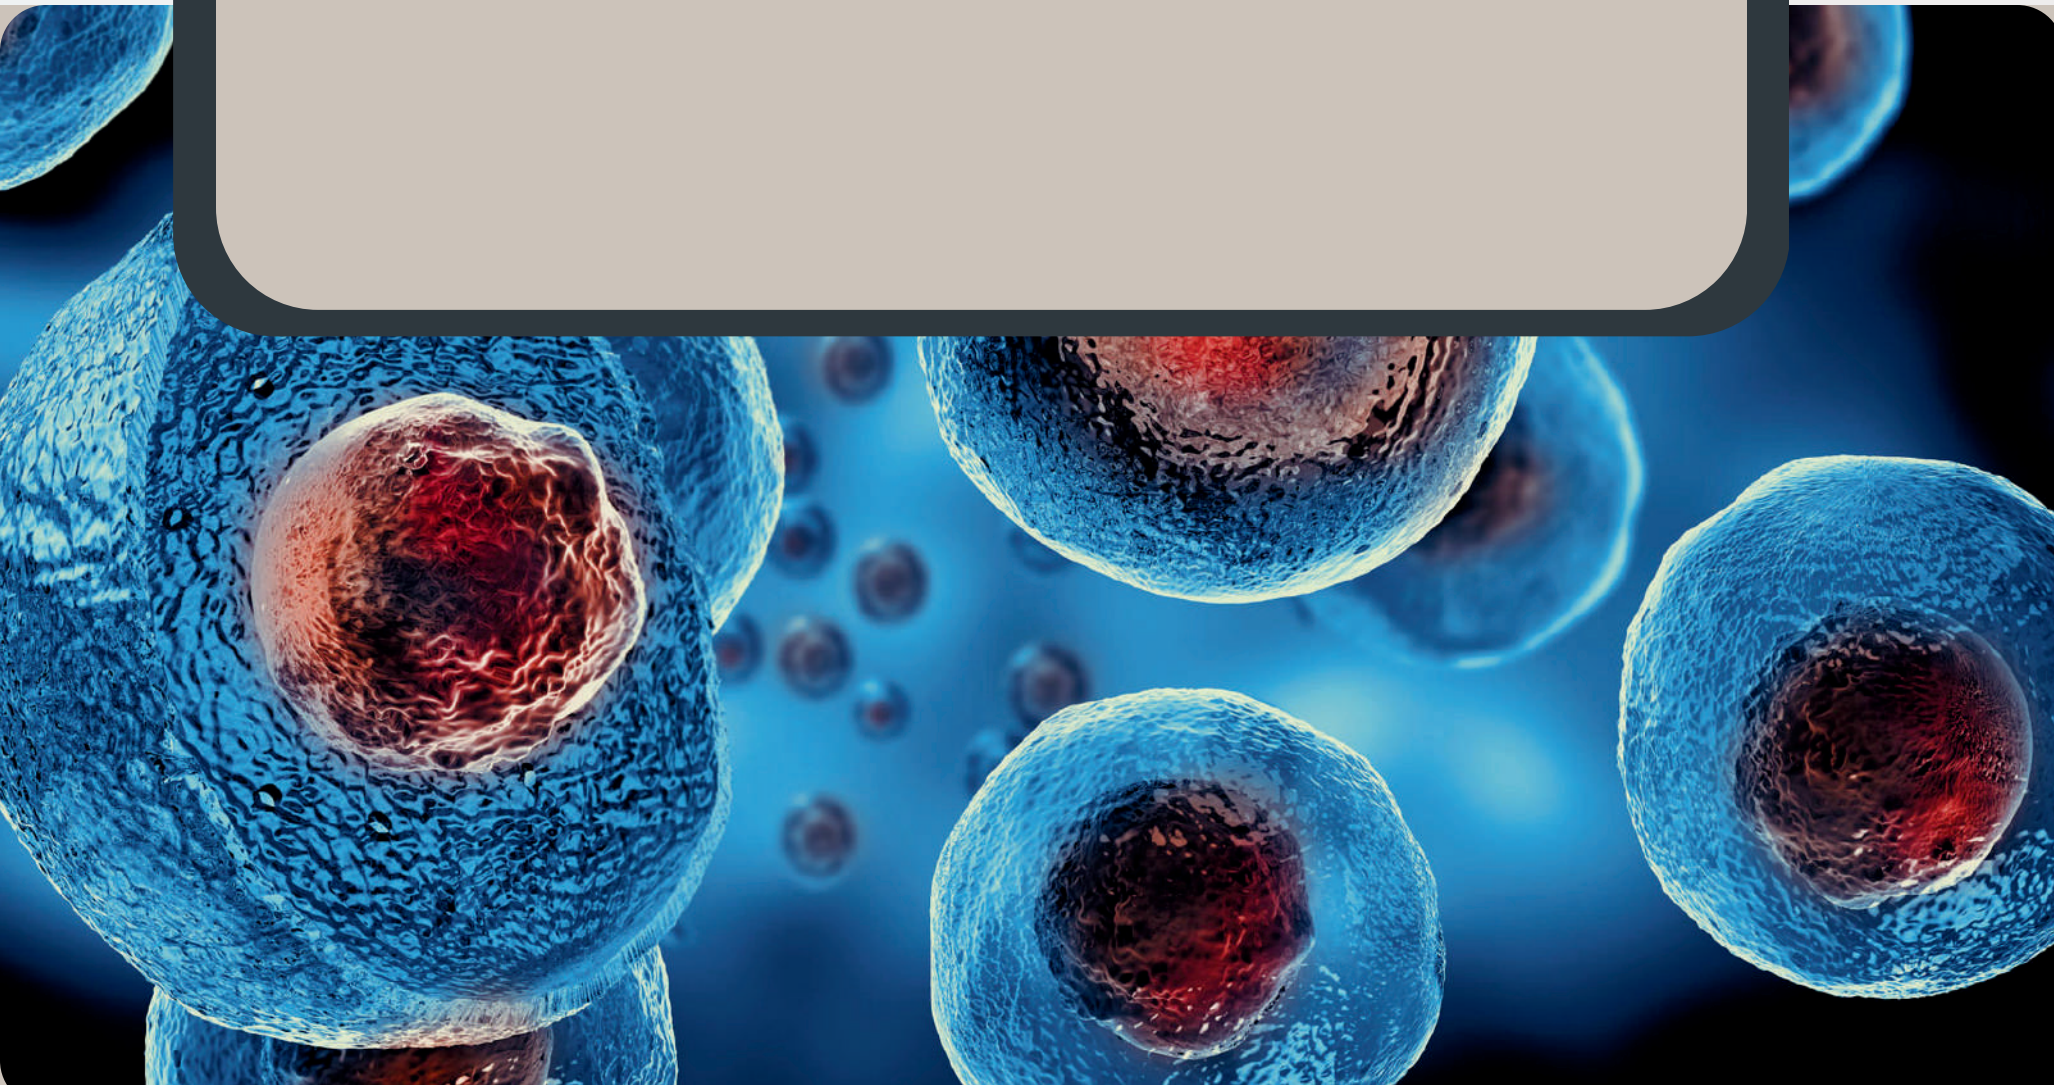

# Cyber Epidural Stimulation

**Cyber Epidural Stimulation** is an FDA- approved application that stimulates the damaged nerves with an electrical current in all spinal cord injuries, amplifies the signals from the nerves to the brain, and restores intentional movements and lost functions.

# Cyber Neuro+ Stem Cell

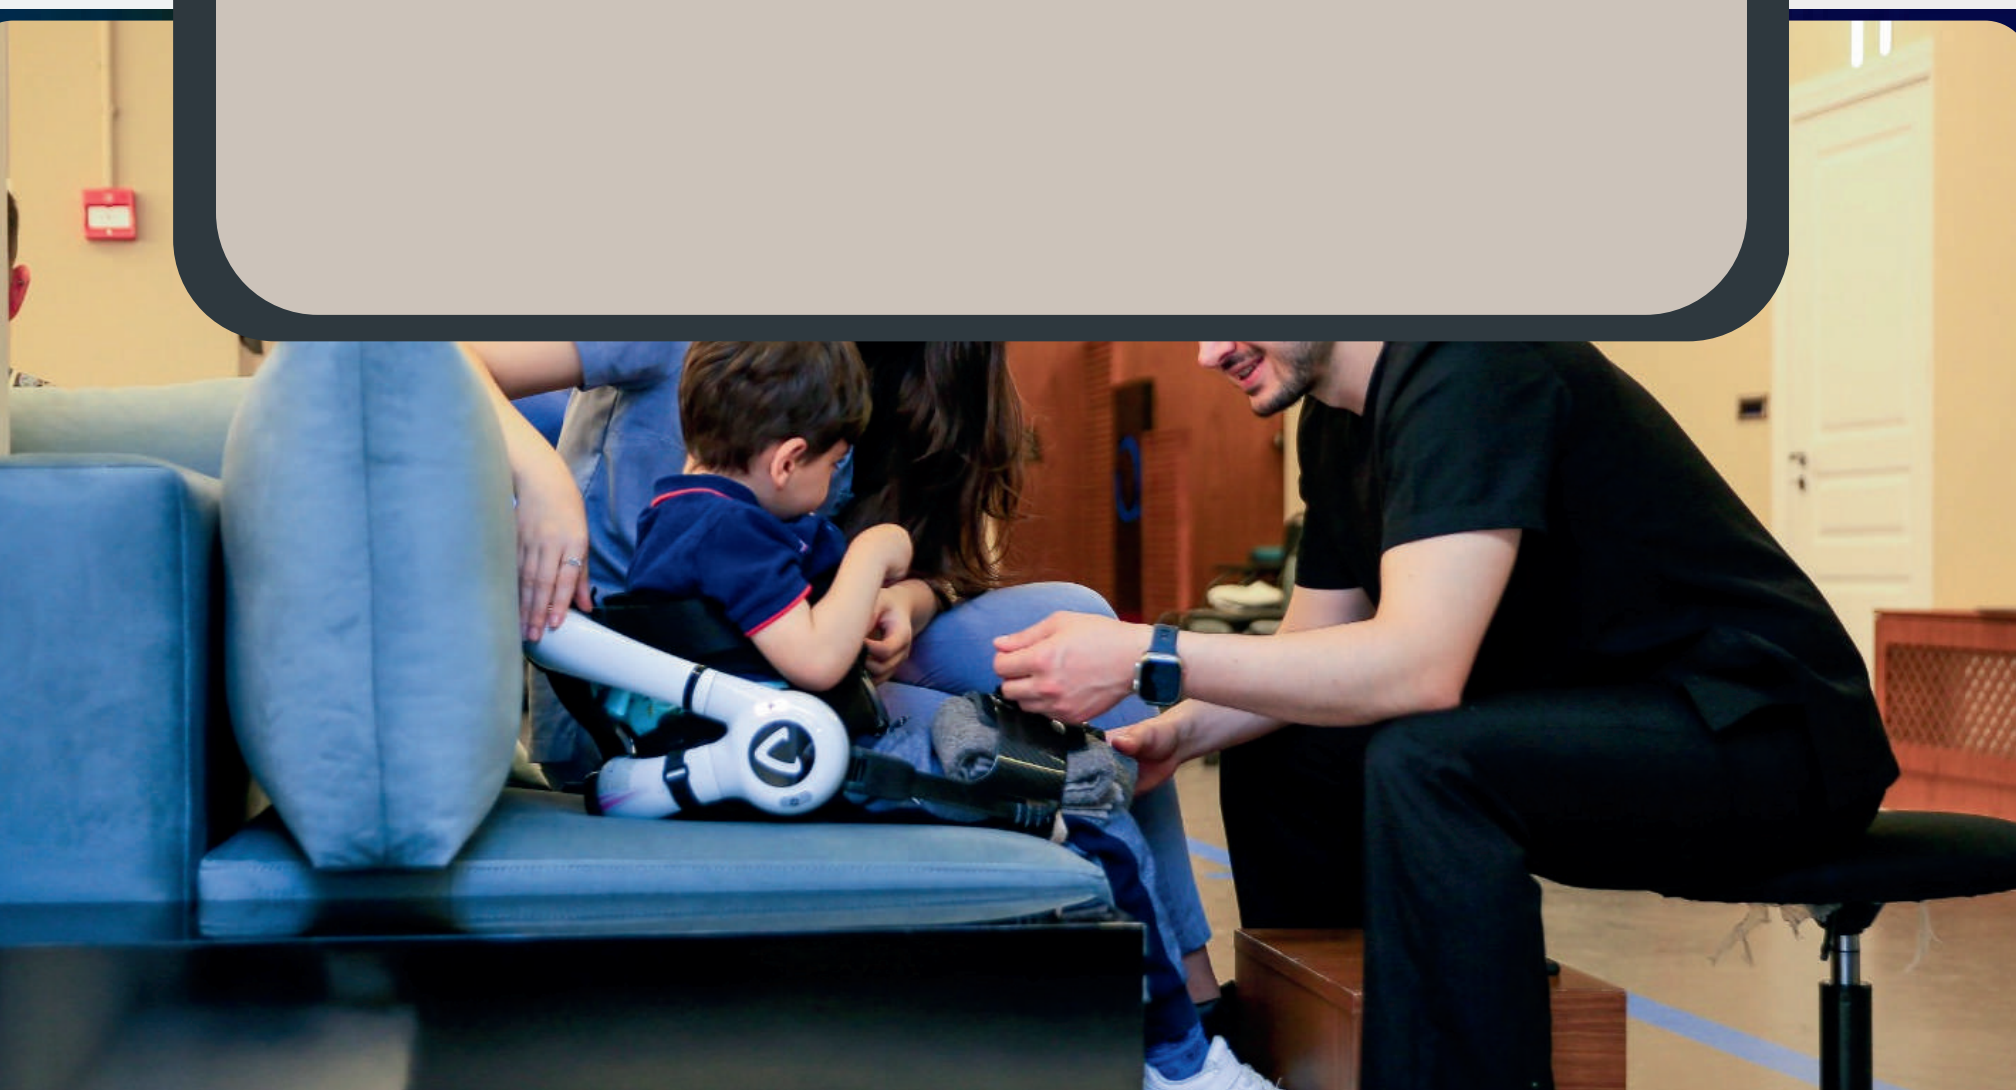

**Cyber Neuro+ Stem Cell (CNSC)** is a high-tech medical application that activates the neural growth factor developed for the healing and regeneration of damaged nerve cells.

CYBERNICX

# Cyber Physio

An all-day therapy opportunity with a Cybernicx certified specialist and personalized physiotherapist.

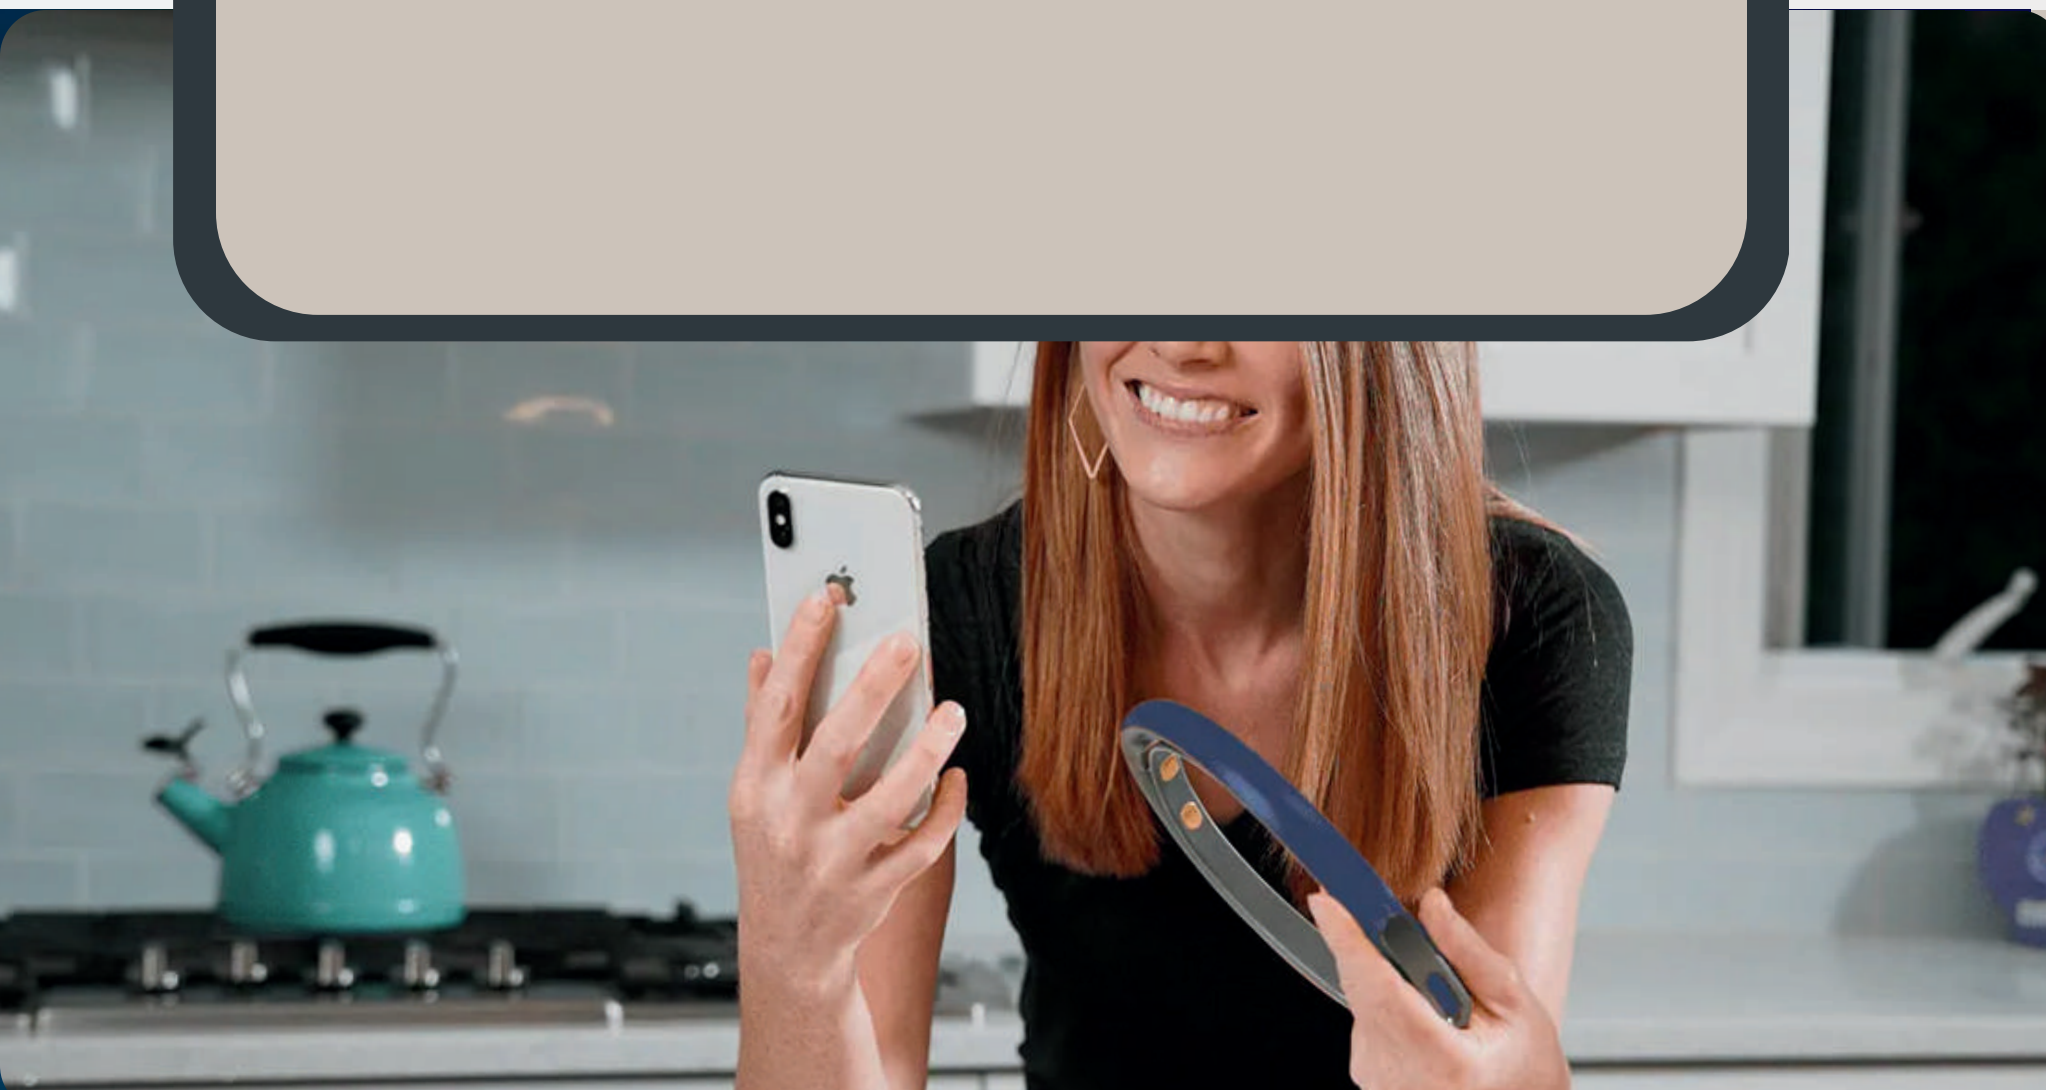

## Cyber Suit

**Cyber Suit** is a neurostimulation suit targeting the nervous system. By increasing muscle activation, it expands range of motion and reduces pain with spasticity. It offers customised treatment to the user with tailored tailoring and programmable features. It contains a total of 58 electrodes and is ideal for individuals with various neurological conditions. Wearable and washable structure provides easy use.

## Focus Calm

**FocusCalm** improves focus and calming skills by measuring real-time mental state through a wearable headband. The technology identifies the individual's strengths and weaknesses by identifying attention loss and improves productivity by creating a personalised plan. The difference from other rehabilitation applications is that it creates a personalised therapy plan with instant focus observation during therapy

## Our Facility

Our facility houses the **only thermal spa on the Anatolian side of Istanbul**. In addition to the Cybernicx therapy, which is created by blending high technology and up-to-date knowledge, you can also benefit from the healing waters of the thermal spa at our facility.
